ZNZ Symposium 21.10.05
Data Blitz Session Part I (11:15 – 11:45)
Auditorium Maximum, ETH-Zentrum

Poster Title and Author

1) Syndecan regulates neural migration and axon guidance in *C. elegans*
   Christa Rhiner, Institute of Molecular Biology – Poster Number: 3

2) Regulated knock-down of serine racemase in the mouse brain by RNA interference and lentivirus-mediated transgenesis
   Torbjörn Johansson, Brain Research Institute – Poster Number: 39

3) Deficits in gating of auditory evoked potentials and prepulse inhibition in NMDA receptor hypomorphic mice
   Stephan Bickel, Institute of Anatomy – Poster Number: 45

4) Development of monoclonal antibodies to the Calsyntenins
   Sebastian Kirbach, Brain Research Institute – Poster Number: 47

5) Neurobin, a novel serine protease in developing murine spinal cord
   Robert Stallmach, Institute of Biochemistry – Poster Number: 57

6) Microglial paralysis in organotypic slice cultures
   Jeppe Falsig, Institute of Neuropathology – Poster Number: 73

7) Differences in cortical and cerebellar force control?
   Birgit Keisker, Institute of Neuroradiology – Poster Number: 115

8) Sleep and recognition memory in mice
   Svitlana Palchykova, Institut für Pharmakologie und Toxikologie - Poster Number: 143

9) The Rubber Hand Illusion in hand amputees – what to expect?
   Anna Burrack, Department of Neurology - Poster Number: 165

10) Rule learning in a foraging task using a model of the prefrontal cortex
    Armin Duff, Institute of Neuroinformatics – Poster Number: 239

Each oral presentation will last two minutes. One question from the audience will be allowed.
