Mini-Symposium

Prefrontal cortical network functions in health and neurodevelopmental disorders

Thursday 24.9.2015
From 16.30 to 18.30 o'clock
Irchel Campus, room Y-17-H-05
Subsequent Apéro

Speakers:

Prof. Patricio O'Donnell, Pfizer, Inc., Cambridge MA, USA
"Taking advantage of D2 receptor functional selectivity to enhance cortical interneuron function"

Prof. Christoph Kellendonk, Columbia University, New York NY, USA
"Maternal immune activation leads to selective functional deficits in offspring parvalbumin interneurons"

Prof. Marco Riva, University of Milan, Milan, Italy
"Prefrontal epigenetic signature of early life stress and vulnerability to mental illness"

Host: Prof. Urs Meyer, University of Zurich
