

Symposium announcement

Environmental Insult and the Brain: focus on Oligodendrocytes and Myelination

Date/Time: 20th December 2 pm – 6 pm

Location: University Main Building, Rämistrasse 71, Room KO2-F-152

A symposium funded by the Oxford-McGill-Zurich Partnership will be held in Zurich on December 20th. The aim of the symposium is to present and discuss recent developments in the understanding of the biology and functions of oligodendrocytes and of their importance in the pathology of psychiatric as well as neurological disorders. Speakers will include neuroscientists, immunologists, psychiatrists and neurologists, presenting data from cellular models, animal models and human imaging and post-mortem studies.

Interested scientists, clinicians and students are very welcome to attend
